Name _____

Plants

Complete the web. Describe how plants are alike.

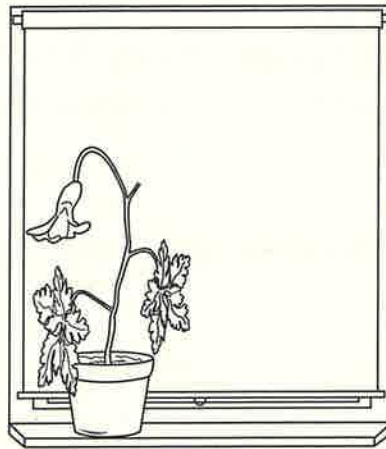

Name _____

Draw Conclusions

A conclusion sums up what you know. You can draw conclusions about what you see in a picture.

Look at the picture. Draw a conclusion about what happened.

1. What do you know from looking at the picture?

2. What do you already know about plants?

3. Draw a conclusion about what happened.

Name _____

**Chapter
Reading Skill**
Chapter 1

Draw Conclusions

You can draw conclusions from what you read.

Read the story. Draw a conclusion about what happened.

Beth planted a garden with lettuce and other plants. She knew there was a rabbit that lived in the woods nearby. One day, she even chased the rabbit away from her garden. When she decided to pick her lettuce, she saw that some of it had been eaten.

1. What do you know from reading the story?

2. What do you already know about rabbits?

3. Draw a conclusion about what happened.

People eat many different _____ parts.

Some plants can be used to make oil. Herbs and spices are parts of plants used to flavor food. Trees are plants that are used for wood and _____ products. Most importantly, plants make _____. When plants make food for themselves, they give off oxygen into the air.

Plants

Circle the letter of the best answer.

1. What do plants use from soil that helps them stay healthy?

a. leaves

b. minerals

c. flowers

d. pollen

2. What is the part of a plant that can grow into a new plant?

a. flower

b. roots

c. seed

d. leaves

3. What is the plant part that grows around the seeds?

a. stem

b. fruit

c. leaves

d. trunk

4. What part of some plants grows seeds?

a. flowers

b. leaves

c. fruit

d. stem

Circle the letter of the best answer.

5. What makes seeds grow inside flowers?

- a. seed coat b. minerals
- c. pollen d. fruit

6. A seed goes through stages as it grows into a plant. What are these stages called?

- a. plant growth b. life cycle
- c. seedling d. sprout

7. What is the powder made by flowers called?

- a. pollen b. minerals
- c. sprout d. roots

8. What do plants give off when they make food for themselves?

- a. seed coat b. pollen
- c. oxygen d. fruit
