Chapter 2

Animals

Complete the chart.

Animal Groups					
Reptiles	Insects		Amphibians		Fish
	have three body parts and six legs	make milk for babies	live on both water and land	have feathers	
snake		cat		sparrow	butterfly fish

Name _____

Compare and Contrast

When you compare, you tell how things are alike. When you contrast, you tell how things are different.

Read the report. Mark an X in the chart to compare and contrast two birds.

The owl and the penguin are two kinds of birds. Owls hunt for their food at night. They have large eyes and good ears to help them find the mice, frogs, and insects they eat. Owls fly very quietly because they have soft, fluffy feathers.

Penguins have feathers, too. They are known for their black and white coloring. Their feathers keep them warm as they swim in cold ocean water, where they hunt for fish. Penguins are great swimmers, but they cannot fly.

	Owl	Penguin
Is a kind of bird		
Has feathers		
Flies		
Swims		
Eats fish		
Hunts at night		

Compare and Contrast

Use the information in your book. Compare and contrast animals groups.

1. What is one way reptiles and amphibians are different from one another?

2. Which animal does not belong in this group? Why not?

3. Compare and contrast insects and birds. How are they alike and different?

Lesson 7

Animals Grow and Change

Use your book to help you fill in the blanks.

How does a black bear grow and change?

1. All _____ grow and change during their whole lives.
2. They grow to look like their _____.
3. When a black bear cub is born, it is _____ and has no fur.
4. At eight months old, the black bear cub begins to _____ and play.
5. An adult black bear can weigh as much as _____ pounds.

How does a butterfly grow and change?

6. Butterflies go through four _____ as they grow into adults.
7. A butterfly begins its life as an _____.
8. When the egg hatches, a _____ crawls out.
9. This is the _____ stage.
10. The caterpillar forms a hard case around itself. This is called the _____ stage.
11. Inside the case, the pupa begins to change into a _____.

Animals

Circle the letter of the best answer.

1. Which group of animals has hair or fur on their bodies?

a. amphibians

b. reptiles

c. mammals

d. insects

2. Which group of animals can live in water and on land?

a. mammals

b. amphibians

c. reptiles

d. insects

3. Snakes are found in which animal group?

a. amphibians

b. mammals

c. reptiles

4. What is an animal that is being hunted by another animal called?

a. prey

b. predator

c. reptile

d. amphibian

5. What is an animal that hunts another animal for food called?

a. prey

b. predator

c. reptile

d. amphibian

Circle the letter of the best answer.

6. A cat, bird, caterpillar, and plant are an example of what?
- a. food chain
 - b. life cycle
 - c. four stages
 - d. mammals
7. What is a place where animals can live and be safe called?
- a. animal group
 - b. food chain
 - c. shelter
 - d. life cycle
8. Butterflies go through four stages as they grow into adults. What are these stages called?
- a. life cycle
 - b. food chain
 - c. animal group
 - d. shelter
9. What stage in a butterfly's life comes right before the adult stage?
- a. egg
 - b. larva
 - c. pupa
 - d. caterpillar
10. A caterpillar appears in what stage of a butterfly's life?
- a. pupa
 - b. larva
 - c. adult
 - d. egg
