When you _____, you use what you know to tell what you think will happen.

In the _____, snow is on the ground for much of the year. It melts for only a short time in the summer. Plants grow _____ to the ground to stay safe from strong winds. Some animals have white winter coats to blend in with the snow. This helps keep them safe from _____.

Land Habitats

Circle the letter of the best answer.

1. Name the habitat that has four seasons and where there is enough rain and light for trees to grow well.

a. woodland forest

b. rain forest

c. desert

d. Arctic

2. What is the place called where plants and animals find what they need to live?

a. shelter

b. home

c. habitat

d. forest

3. What is it called when animals move from one habitat to another?

a. transfer

b. migrate

c. run

d. sleep

4. Name the habitat in which the tops of trees get a lot of sunlight but not as much sunlight reaches the ground.

a. woodland forest

b. desert

c. rain forest

d. Arctic

Circle the letter of the best answer.

5. Name the habitat that is very dry and gets less rain in a year than most plants and animals need to live.

a. desert

b. Arctic

c. woodland forest

d. rain forest

6. Name the habitat that gets rain almost every day.

a. desert

b. rain forest

c. woodland forest

d. Arctic

7. Name the habitat that has snow on the ground for much of the year.

a. Arctic

b. desert

c. woodland forest

d. rain forest

8. The woodland forest is an example of what?

a. desert

b. rainforest

c. habitat

d. predator

Chapter Organizer

Chapter 4

Water Habitats

Look at this organizer. The top shows the main idea. The middle shows two parts of the idea. The bottom shows details about each part.

Complete this organizer.

© Macmillan/McGraw-Hill

Find the Main Idea

Every story has one main idea. Other facts in the story tell more about the main idea.

Tim likes to walk around the pond. He walks there with his parents at sunset. He enjoys hearing the ducks quack at each other. He likes how the cattails move in the breeze. Sometimes he even sees a fish flip up out of the calm water to catch an insect.

Main idea:

Tim likes to walk around the pond.

More about the main idea:

he goes with his parents
they go at sunset
he enjoys ducks quacking
he likes the cattails
he sees fish catch insects

Read each story. Circle the sentence that is the main idea. It is not always the first sentence.

You can see many animals on the shore of California. When the tide goes out, you can walk on the rocks at the edge of the ocean. The holes in the rocks are little pools. You can see starfish, anemones, and crabs in the little pools. If you look further out across the water, you can see otters playing in the kelp, a kind of seaweed. Sometimes, you can even see a whale swimming by in the distance.

When Pat went scuba diving in the ocean, she saw many small colorful fish. Some were swimming all around her and others darted away. She also saw an eel sticking its head out from a hole in the coral wall where it lived. The most exciting thing, though, was seeing some small sharks. Pat saw many kinds of ocean animals when she went diving.

Find the Main Idea

Every story has one main idea. Other facts in the story tell more about the main idea.

Read these facts. Which sentence best tells the main idea for these facts?

Facts

1. Some sharks have very small teeth. They eat plankton and small fish.
2. Other sharks eat large animals such as seals and turtles.
3. Most sharks eat fish.

Main Idea

- a. Sharks eat a variety of food. b. Sharks are dangerous.

Facts

1. Native Americans made coins from seashells.
2. Small shells have been made into buttons.
3. Shells have also been made into necklaces.

Main Idea

- a. People have always collected seashells.
b. People have used shells in many ways.

Facts

1. The ocean floor has gentle slopes.
2. There are mountains and valleys under the ocean.
3. Some underwater canyons have very steep walls.

Main Idea

- a. The ocean floor is not flat.
b. The ocean has deep parts.
