Activity**  
Lesson 8

# Caring for Earth's Habitats

Fill in the blanks. Use the words in the box.

## Vocabulary

pollution

recycle

landfills

walking

Cars and factories can cause air \_\_\_\_\_.

People are working to make the air cleaner.

We can help keep the air clean by riding bikes and

\_\_\_\_\_.

We throw away tons of garbage every year. Much of this garbage goes to big pits in the ground called

\_\_\_\_\_. We can cut down on waste. We can \_\_\_\_\_ paper, glass, cans, and plastic.

# Water Habitats

Circle the letter of the best answer.

1. What is a fresh water habitat with moving water called?

a. pond

b. stream

c. ocean

d. pool

2. What is a large body of salt water called?

a. lake

b. pond

c. ocean

d. stream

3. What is the name of the body of water that salmon swim in to find a place to lay eggs?

a. stream

b. pond

c. sea

d. pool

4. What is a fresh water habitat that stays in one place called?

a. sea

b. stream

c. pond

d. ocean

**Circle the letter of the best answer.**

5. What is a group of several food chains that are connected together called?
- a. habitat                                      b. food web  
c. life cycle                                    d. prey
6. When waste is made into new things and used again, what is it called?
- a. pollution                                    b. recycled  
c. garbage                                      d. habitat
7. What is waste that harms land, water, or air called?
- a. pollution                                    b. clean-up  
c. recycling                                    d. landfill
8. What can we do to care for Earth's habitats?
- a. plant trees                                   b. recycle wastes  
c. ride bikes                                    d. all of these choices

Read each statement. Use the words in the box.

### Vocabulary

Arctic

stream

recycle

ocean

migrate

pond

pollution

1. This word describes a large body of salt water.  
\_\_\_\_\_
2. This word describes waste that harms land, water, or air.  
\_\_\_\_\_
3. This word identifies a fresh water habitat that flows.  
\_\_\_\_\_
4. This word describes what birds do when they move to warmer places. \_\_\_\_\_
5. This word describes a fresh water habitat that stays in one place. \_\_\_\_\_
6. This word describes saving paper, glass, cans, or plastic and making them into new things. \_\_\_\_\_
7. This word describes a place where snow is on the ground for much of the year. \_\_\_\_\_

Name \_\_\_\_\_

# Unit Vocabulary

Unit B

## My Words

Pick two words from this unit. Draw a picture to illustrate each word. Then write about your picture.

The form consists of a large rectangular box divided into two horizontal sections. The top section is for drawing a picture, and the bottom section is for writing about the picture. Each section contains three horizontal lines for writing.

Name \_\_\_\_\_

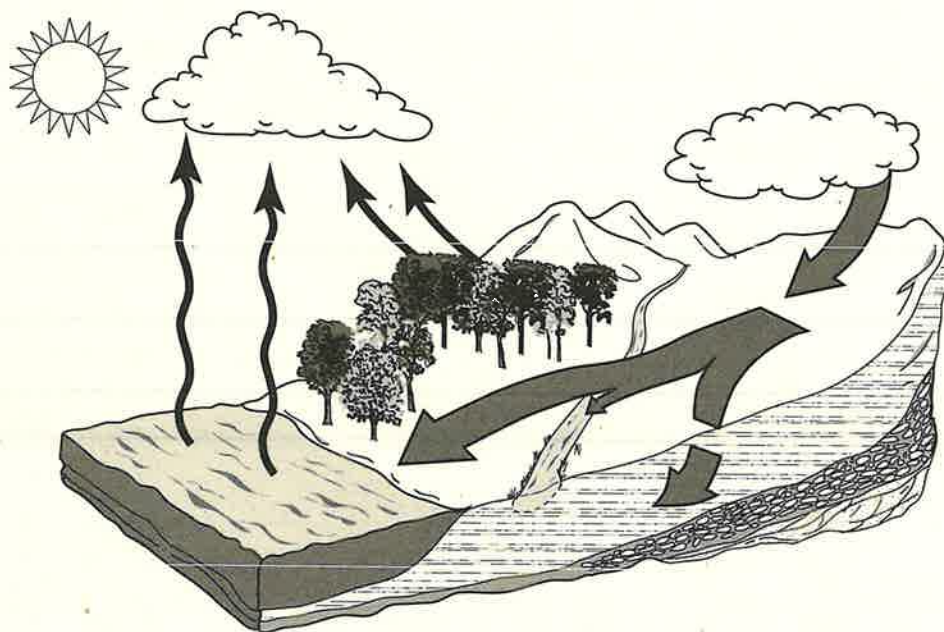

# Chapter Organizer

## Chapter 5

# Weather and Other Earth Changes

You can use a graphic organizer like this one to show a cycle that begins and ends in the same place. Show how water moves between the ground and the sky. List the different stages in the water cycle.

The Water Cycle

© Macmillan / McGraw - Hill

# Sequence of Events

Read the examples of Earth's erosion. Then number the events in the order in which they happened.

1. Over thousands of years, the wind blew and moved sand. The sand rubbed against rocks, which wore down the rocks bit by bit. A canyon was formed.

\_\_\_\_\_ A canyon was formed.

\_\_\_\_\_ The wind blew and moved sand.

\_\_\_\_\_ The sand rubbed the rocks, which wore down the rocks bit by bit.

2. The people on the beach could tell by the dark clouds that a storm was coming. They gathered their things and went home. Soon, strong winds began to blow the sand. The huge waves carried sand away into the ocean. When the people came back the next day, they could see how much erosion the storm had caused to the beach.

\_\_\_\_\_ Strong winds blew the sand.

\_\_\_\_\_ The people went home.

\_\_\_\_\_ The people came back and saw how much the beach had eroded.

\_\_\_\_\_ The people noticed the storm clouds.

\_\_\_\_\_ The huge waves carried sand away.

**Put the events in order to show how a volcano can change Earth.**

1. \_\_\_\_\_ The cooled lava becomes hard rock.
2. \_\_\_\_\_ The melted rock, called lava, flows down the side of the mountain.
3. \_\_\_\_\_ The lava cools.
4. \_\_\_\_\_ Hot, melted rock erupts through a hole in Earth's surface.

**Now draw the four steps in the right order to show how a volcano can change Earth.**

| First: | Second: | Third: | Fourth: |
|--------|---------|--------|---------|
|        |         |        |         |

Lesson 1

# Water and Our Weather

## Vocabulary

evaporates

condense

precipitation

water vapor

Fill in the blanks. Use the words from the box.

Heat from the Sun \_\_\_\_\_ water in lakes and oceans. When water evaporates, it goes into the air. Water that goes into the air is called \_\_\_\_\_. Cool air makes water vapor \_\_\_\_\_ into tiny drops of water. The drops of water form clouds. When the drops in the clouds get big enough, they fall to the ground as rain, snow, or hail. Rain, snow, and hail are called \_\_\_\_\_. Water returns to the lakes and oceans. The water cycle begins again.

Lesson 2

## Earth Can Change Slowly

Use your book to help you fill in the blanks.

### How can rocks change?

1. When worn down rocks are carried away, it is called \_\_\_\_\_.
2. When water or ice rub against rock, it \_\_\_\_\_ away at the rock.
3. Water can move small \_\_\_\_\_.
4. Wind can make \_\_\_\_\_ rub against rocks.
5. The rubbing wears down the \_\_\_\_\_ bit by bit.

Name \_\_\_\_\_

# Lesson Outline

Lesson 2

## How can sand and soil change?

7. Bits of rock that wear away from bigger rocks become \_\_\_\_\_ and sand.
8. Bits of dead plants and \_\_\_\_\_ also become part of soil.
9. Water can \_\_\_\_\_ soil and sand.
10. \_\_\_\_\_ can also erode soil and sand by blowing it away.
11. \_\_\_\_\_ help to keep soil and sand from eroding.
12. Plant \_\_\_\_\_ hold soil or sand in place.

### Vocabulary

erosion

communicate

1. When water or wind wears something down, it is called \_\_\_\_\_.

2. Rocks and soil can be changed through \_\_\_\_\_.

3. When you \_\_\_\_\_, you share what you know.

Circle the letter of the best answer.

4. What happens to an ocean beach during a storm?

a. surfing

b. swimming

c. fishing

d. beach erosion

Draw a picture of something that can keep land from eroding.

Name \_\_\_\_\_

# Cloze Activity

Lesson 2

## Earth Can Change Slowly

### Vocabulary

communicate

soil

erosion

roots

Fill in the blanks. Use the words from the box.

When you \_\_\_\_\_, you share what you know. You can share what you know about erosion.

Rocks can be changed by \_\_\_\_\_. It may happen so slowly that you cannot see it. Sand and \_\_\_\_\_ can be changed by erosion, too. Plants help to keep soil and sand from eroding. The \_\_\_\_\_ of the plants hold soil or sand in place.

Name \_\_\_\_\_

# Lesson Outline

Lesson 3

## Earth Can Change Quickly

Use your book to help you fill in the blanks.

### What is an earthquake?

1. Earth's crust is made up of pieces called \_\_\_\_\_.
2. These plates fit together like a \_\_\_\_\_.
3. Sometimes the edges of two plates \_\_\_\_\_ or rub against each other.
4. This can cause an \_\_\_\_\_.

### What is a landslide?

5. A sudden movement of soil down a hill is a \_\_\_\_\_.
6. \_\_\_\_\_ sometimes cause landslides.

Name \_\_\_\_\_

## Lesson Outline

### Lesson 3

## What is a landslide?

7. Landslides may also happen when a lot of \_\_\_\_\_ makes the soil heavy and slippery.

## What is a volcano?

8. A \_\_\_\_\_ is a mountain.
9. It forms when hot, melted \_\_\_\_\_ erupts through a hole in Earth's surface and builds up.
10. The melted rock that flows out of the volcano is called \_\_\_\_\_.
11. Lava becomes hard \_\_\_\_\_ when it cools.
12. Volcanoes often form in places where Earth's \_\_\_\_\_ rub against each other.

Name \_\_\_\_\_

# Earth Can Change Quickly

Draw a picture of an earthquake, landslide, and volcano.  
Use the words above the box to label your drawings.

earthquake  
Earth's crust  
plates

landslide  
hill

volcano  
lava  
rock
