Earth

The Moon is Earth's nearest neighbor. It is a ball of rock that orbits _____. The surface of the _____ has mountains and smooth areas.

The Moon also has many _____, or large holes.

The Moon Changes

Use your book to help you fill in the blanks.

What happens as the Moon seems to get bigger?

1. The different shapes of the Moon that we can see as it orbits Earth are called _____.
2. The _____ Moon is the first phase.
3. We can not see the new _____ because its lit side is turned away from Earth.
4. After about 14 nights, we can see a _____ Moon.

What happens as the Moon seems to get smaller?

5. With a new Moon, the Moon's _____ side is turned away from Earth.
6. When the Moon is full, _____ is between the Sun and the Moon.
7. When the Moon is _____, we can see all of the Moon's lit side.

tools

Much of what we know about space comes from spacecraft called _____. They carry _____ that help us explore other planets. Jupiter is the largest _____ in our solar system. It has clouds and rings of dust. Jupiter has 28 moons that we know of. Pluto is the smallest planet in our _____. It is also the coldest. Pluto is made of rock and ice. It has one moon.

Moon, Stars, and Planets

Circle the letter of the best answer.

1. What is the name of our nearest neighbor in the solar system?
 - a. the Sun
 - b. the Moon
 - c. Venus
 - d. Mars

2. What are the large holes on the Moon called?
 - a. mountains
 - b. space crafts
 - c. craters
 - d. rocks

3. What are the different shapes that the Moon seems to have as it orbits Earth called?
 - a. phases
 - b. Moon
 - c. Earth
 - d. orbits

4. What are the hot balls of gases that can be see in the night sky called?
 - a. holes
 - b. mountains
 - c. stars
 - d. fires

5. What is the name for a star pattern that makes a picture?
- a. Jupiter
 - b. Saturn
 - c. Moon
 - d. constellation
6. What do we call the Sun, the nine planets, and their moons?
- a. solar system
 - b. constellation
 - c. spacecraft
 - d. space probe
7. What do we call the huge objects that travel around the Sun?
- a. paths
 - b. orbits
 - c. planets
 - d. moons
8. What is the name of the object that orbits around Earth?
- a. the Moon
 - b. a constellation
 - c. the solar system
 - d. a planet
