Lesson 5

Light

Use your book to help you fill in the blanks.

What is light?

1. A kind of energy that lets us see is
_____.
2. Light travels in _____ lines.
3. When light hits an object, some of it
_____, or bounces off, the object.
4. When light reflects off _____ objects,
like mirrors, it bounces in one direction.
5. Glass or water can _____ light.
6. This is called _____.
7. Bending light can make something look
_____.

Lesson 5

How do we use light?

8. Much of Earth's light is from the _____.
9. All living things need the energy from _____.
10. Without the Sun, Earth would be in _____.
11. Nothing would be able to live or _____ here.
12. People once used _____ for light at night.
13. Now we use _____ lights to help us see.

Name _____

Light

Tell about light. Use the words in the box.

Lesson 6

Sound

Use your book to help you fill in the blanks.

What is sound?

1. A kind of energy that you hear is called

_____.

2. Sound is made when something _____,
or moves back and forth.

3. Vibrating air carries the _____ you hear.

4. When you speak, air from your lungs makes your
_____ chords vibrate.

5. Sound travels in _____.

6. Sound waves move through the air like
_____ in a pond.

What is loudness?

7. Not all _____ are the same.
8. Big _____ make loud sounds.

What is pitch?

9. Sounds can also be _____, low, or somewhere in between.
10. Pitch is how high or how low a _____ is.

What can sound move through?

11. Sound can move through gases, liquids, and _____.
12. Most sound you hear is moving through _____.

Chapter 10

Energy

Circle the letter of the best answer.

1. What is the power that makes matter move or change?

a. melt

b. energy

c. rocket

d. freeze

2. What do you add to make something boil or melt?

a. cold

b. light

c. heat

d. rocks

3. What does a fire need to give off heat?

a. fuel

b. light

c. stove

d. rocks

4. What kind of energy lets us see?

a. line

b. object

c. bounce

d. light

5. What is it called when light bounces off an object?

- a. reflects
- b. line
- c. eye
- d. shadow

6. What is it called when glass bends light?

- a. reflection
- b. refraction
- c. vibration
- d. eye

7. What kind of energy do you hear?

- a. light
- b. reflection
- c. sound
- d. ear

8. How is sound made?

- a. refraction
- b. reflection
- c. ear
- d. vibration

Chapter 11

Forces and Machines

You can use a table to show cause and effect.

Read Chapter 11 Forces and Machines. Use what you learn about gravity, friction, and simple machines to fill in the table. The first one has been done for you.

CAUSE		EFFECT
When I sled down the hill . . .		gravity makes me go faster.
When I throw a ball in the air . . .		_____
When I roll a marble across a rough surface . . .		_____
When I hit a golf ball with a lot of force . . .		_____
When I put force on one side of a lever . . .		_____

© Macmillan/McGraw-Hill

Name _____

Compare and Contrast

When you compare, you tell how things are alike. When you contrast, you tell how things are different.

Read the story. Use the table to compare and contrast the two characters in the story.

Two brothers live near a lake. Their favorite time of year is summer. When school is out, they spend their days at the lake. Chris loves to swim. He splashes and plays in the lake all day long. John doesn't like to swim. He would rather spend his day fishing.

The brothers do chores every morning before they go out to play. Chris and John both make their beds and sweep their rooms. Chris takes out the trash. John feeds their dog Barney. Once the work is done, the brothers race to the lake. They love the summer time!

Make an X in the column to compare the two brothers.

	Chris	John
Lives near a lake		
Likes to swim		
Likes to fish		
Makes bed every day		
Sweeps room every day		
Takes out trash		
Feeds Barney the dog		
Loves summer time		

Compare and Contrast

Read the story. Use the diagram to compare and contrast two sports. It is started for you.

Baseball and basketball are both fun sports to play. A baseball team has nine players on it. The teams take turns trying to score runs by hitting the baseball with a bat and running the bases. Every time someone crosses home plate, that team scores a run. When one team is at the plate, the other team is in the field trying to keep the team from scoring runs. The team with the most runs after all the innings are played wins the game.

A basketball team has five players. The players dribble the basketball and try to shoot it into the basket. When one team is trying to score, the other team tries to stop them. If the ball goes through the basket, the team scores two points. The team with more points at the end of the game wins.

Lesson 1

Pushes and Pulls

Vocabulary

force

gravity

path

Fill in the blanks. Use the words from the box.

A push or a pull makes something move or change direction. A push or a pull is called a _____. Objects can move in different ways. You can tell about how objects move by the _____ they make.

The force that pulls things toward Earth is called _____. It also holds you on Earth. You can see the pull of _____ when you let go of an object. The object will fall toward Earth.

Forces and Change

Use your book to help you fill in the blanks.

What slows things down?

1. Friction is a force that _____ down moving things.
2. Friction happens when two things _____ together.
3. There is more friction on _____ surfaces than on smooth ones.
4. It is _____ to push or pull something over a rough surface than over a smooth surface.

What happens when you change a force?

5. When a force _____, the way a thing moves changes too.
6. More force can make a golf ball move _____ and farther.
